**MATCON® B V**

For the control of your materials.

## Specifications

Type:	Permanent yoke
Lifting power:	More than 18 Kg
Dimensions:	Outer diameter of the permanent magnet: 45mm Height of the magnets: 145mm Length of junction cable: 420mm
Weight:	2 Kg.
Extra options:	On request

This test instrument consists of 2 permanent magnets which are connected with a flexible cable. Uncomplicated, fast, and efficient testing becomes possible by this simple method. The magnetic field strength is sufficient to ensure the detection of surface discontinuities such as cracks and overlapping's.

Also suitable for underwater magnetic inspections.
